Do your children love to play outside? The playhouse Lakeside by AXI from the ecological Valley Green series, offers children the opportunity to let their imagination run free. Lakeside is a fun and simple playhouse with a neutral wood look, which makes it perfect for any garden. Children can open and close the windows at Lakeside and enter through a sturdy half door. The Lakeside playhouse is made from organic residual material that looks like real wood, and features FSC 100% wood details.

SUSTAINABLE ECO- OUTDOOR TOYS

The playhouse Lakeside from the ecological outdoor toy series Valley Green is produced from biological waste. The material called UPB (Universal Performance Board) consists of about 60% rice husk, about 22% rock salt and about 18% mineral oil. It is a perfect alternative to wood, because it has the look and feel of wood.

The natural material possesses unique properties and is 100% recyclable, weatherproof, it does not rot, split or splinter and is also easy to maintain. In addition, the sheet material does not become slippery in damp conditions and is therefore non-slip. In summary, the Valley Green toys are not only super fun to play with, but also very safe for children.
